AGRICOLDS STOLEN IN AP AIR BREAK-IN

August proved to be a month of highs and lows for AP Air. The team's excitement at the company's record-breaking day of sales was short lived as news emerged the following week that our Gloucestershire warehouse had been broken into.

The operation was well planned and 2 Agricolids, a R134a and a R1234yf model, were stolen along with hydraulic crimpers. The theft is under investigation and thanks to the amazing support of customers and friends on social media we hope that these service machines will now have become too hot to handle. If you hear of anything suspicious that might be related to the case, please call us on 01453 891320.

CITY & GUILDS F-GAS TRAINING

Interested in City & Guilds certified F-gas training? We can help!

On the 4th July 2010 the European F-gas regulation EC 842/2006 came into force which meant that any mechanics / technicians dealing with automotive air conditioning service equipment must be assessed and certified to a recognised DEFRA standard and hold a qualification in their own name. Our trading company, AP Auto provides F-gas training either at our premises in Gloucestershire or on-site at your workshop. The course covers health and safety, system design, operation, legislation and working principles in a mix of theory and practical learning prior to sitting a test. For more information or to book, please call Dave on 01453 796905 or email dave@apauto.co.uk

THIS MONTH'S BLOG

Head to the website for our latest blog, which explains why flushing the AC system is such an essential service procedure.

VESNA DUAL-ZONE COMPRESSOR COOL BOXES

Perfect for ■ Field work ■ Camping and touring ■ Fishing
■ Hunting ■ Marine use ■ Medical transport.
Email sales@apairltd.com to reserve yours.

FLUSHING FOCUS

FAST FLUSH
Flushing Fluid Can
Part No: 530-TR1009.U.M1

The flushing fluid Belnet is pressurised with Co2 in an aerosol can and can safely be used directly with the special flush gun shown opposite.

FAST FLUSH
Flushing Fluid Gun
Part No: 530-RP1047.01

AIRCO BIO FLUSH
AC Flushing Fluid
Part No:
530-1060 5 litres
530-1060-1 1 litre

HAND FLUSH KIT
Canister, hose & gun
Part no: 530-1057
 Ideal for quickly and effectively removing old refrigerant oil and debris before compressor replacement or retro-fitting system. Designed to work with any light weight A/C flushing material.

MASTERCLEANSE
AC FLUSHING
STATION
Part No: 530-69900-220

Large volume flush machine designed to flush all HVAC/R and automotive systems. Can remove solids and residues caused by breakage of compressor or filters. Durable roll-away wheels and handle for manoeuvrability. Pump flow rate 4g/min (16l/min) ■ Pump motor 300 watts ■ Pump Horsepower 220-240V /50/60 Hz - 0.4 HP or 220-240V /50/60 Hz - 0.28 HP ■ 9ft (3m) clear coiled flexible hose ■ 2.6 gal (10l) flush container.

BEST SELLER

AG MASTER O-RING KIT
 ■ 24 part numbers
 ■ 160 o-rings
Part No: 440-1010UK

This must-have kit contains 160 assorted agricultural o-rings for servicing tractor AC systems. Includes handy re-order part info.

*These parts are AP Air Group parts and are not manufactured by the Original Equipment Manufacturer (OEM). Original Manufacturer's names, part numbers and descriptions are quoted for reference purposes only and are not intended to indicate or suggest that our replacement parts are made by the OEM.

KEEP IT CLEAN

With a requirement on the horizon for passenger-carrying vehicles to have a cleaning/sterilising system onboard for safety purposes, we decided as HVAC specialists it was our responsibility to help you stay ahead of the game.

After working with our suppliers to find a solution for this problem, we've collated a range of O₃ generators and air purifiers that are suitable for all types of vehicles from ambulances to coaches. The units can be mounted in the roof or under the seat, depending on the size of the vehicle.

For more information and product recommendations based on your individual requirements, please contact the sales team.

Ozone Generators

If you're wondering how effective the units are, it's worth knowing that Ozone gas (O₃) is the second most powerful steriliser in the world. As well as its documented ability to kill viruses and bacteria, it also neutralises odours. O₃ also sterilises hard surfaces such as grab handles and seat trays.

NY-1000 ▲

- Suitable for 7.8m - 12m bus
- Ozone qty: 1000mg/hour

CK2029252 ▲

- Suitable for 7.8m - 12m bus
- Ozone qty: 1000mg/hour

TY-SZ-01 ▲

- Suitable for 7.8m - 12m bus
- Ozone qty: 150 - 250mg/hour

Air Purifiers

Air purifiers use a 3-stage method of cleaning the air; negative ion, ultraviolet and photocatalyst. The electrostatic precipitator generates positive and negative ions which remove dust, pollutants and inhibit bacteria growth. UV sterilisation lamps effectively kill all types of bacteria and viruses, while Photocatalyst TiO₂ causes harmful gases, smells and viruses in the air to decompose.

NBKJ-003-A (L&R, 2 pcs/set) ▲

- Optional air quality display panel

SUITABLE FOR 45-53 SEATER

▲ NBKJ-007-A
